

Apps/Project to use at home!

All of us are stuck at home! So, here are some events that are apps or websites that use citizen science.

- iNaturalist
 - <https://www.inaturalist.org/>
 - This is an app where you can share observations of flora and fauna.
 - Take a snap of wildlife using the app. These photos will be analyzed by scientists at scientific data repositories like the Global Biodiversity Information Facility.
- Loss of the Night
 - <http://www.myskyatnight.com/#about>
 - This app can be used to track light pollution.
- Globe at Night
 - <https://www.globeatnight.org/>
 - This app and website can also be used to track light pollution.
 - The website and resources for Globe at Night seem to be more recently updated than Loss of the Night.
- Crowd the Tap
 - <https://crowdthetap.org/about/>
 - This project is operated only on the website.
 - This project helps researchers with knowledge about water pipes in homes.
 - Chapters may find it easier to directly contact Crowd the Tap for pipe detection kits.
- Silent Earth
 - <https://www.anecdata.org/projects/view/509>
 - By NASA
 - App: anecdata.org
 - In order to join this project, users would have to locate the Silent Earth page

- This project measures sound levels in order to track environmental noise pollution.
